JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

FOREIGN AND INSULAR.

BRAZIL.

Para—Plague.

The American consul at Para reported to the Department of State September 21 the presence of bubonic plague.

BULGARIA.

Measures against the Importation of Cholera.

The American diplomatic representative at Sofia reported to the Department of State August 11:

In view of the presence of cholera at Odessa, Russia, the Bulgarian government has ordered into effect all precautionary measures as regards vessels, travelers, and merchandise arriving from Odessa.

CUBA.

HABANA—Quarantine against Mexican Ports—Morbidity.

Passed Assistant Surgeon de Valin reports, September 14:

The Cuban authorities have raised the quarantine against Veracruz, Mexico, so that passengers arriving from that port will be permitted to land without detention at Tricornia quarantine station. Quarantine against Progreso and Merida will not be discontinued, and passengers will not be permitted to land until six days after their embarkation.

No quarantinable disease has been reported in the island during the week.

Transmissible diseases in the island.
